SUMMARY

With 8 years experience for software engineering, I took the path to being a global developer focusing on new technology and innovative ideas. Now software engineering is my life and it gave me happiness that I change the world and contribute to prosperity of humanity. Leaving from financial benefit, I am glad with even only facts that my creations exist in the world and all the process for development make me to be better, more global and more kindly. My goal is to be real full stack engineer. By sharing technology, learning new tech and implementing client's idea fully, I will build my career and make the world wonderful.

PROFESSIONAL EXPERIENCE

Remote Full Stack Engineer

Softite LLC   📅 05/2020 - Ongoing   📍 United State

- Contributed to a fleet management project that facilitates operations between fleet owner companies and maintenance companies.
- Wrote unit and end-to-end tests using Jest to ensure that the APIs are working as expected.
- Supported making the CI/CD pipeline work properly with the codebase.
- Helped create database models, relationships, and extensions.
